

VDS REPORT TO PPG AGM – 18th October 2016

As you know the scheme has been in operation now for seven and a half years.

We currently have a team of 11 dedicated volunteer drivers who are part of the Patient Participation Group at the surgery.

At the end of September 2015 we had completed 1676 trips and went on to complete 2400 for the whole year. Currently at the same stage in 2016 we have completed 1684 trips.

So far in 2016 we have transported

115 patients from Cherry Willingham to Cherry surgery and 465 patients to Nettleham surgery.

582 patients from Nettleham to Nettleham surgery and only 7 to Cherry surgery.

23 patients from Fiskerton to Cherry surgery and 89 to Nettleham surgery.

39 patients from Langworth to Nettleham and only 4 to Cherry surgery.

97 patients from Reepham to Nettleham surgery and only 10 to Cherry surgery.

88 patients from Scothern to Nettleham surgery and only 1 to Cherry surgery.

59 patients from Sudbrooke to Nettleham surgery and none to Cherry surgery.

There are a few other places that we have transported from but the figures are very low.

Signed on behalf of the VDS Scheme

Alan Price

Scheme Co-ordinator
